The Energo Difference

Energy costs take up a large percentage of a business's budget. With fluctuating energy costs due to stresses on supply and demand wouldn't it be nice to find some stability with an advisor who can keep you up to date on the energy market and options available to you? Wouldn't it be nice to have some cost certainty and avoid volatility in rates? Energo is your trusted energy partner serving businesses across New York and the Northeast for over 25 years. We are committed to helping companies reduce their overall energy costs and increase profits. At Energo, our personal energy advisors work with local businesses one on one to customize an energy plan designed specifically to reduce operating expenses and create supply rate stability in an unstable energy market. We supply our customers with electricity and natural gas. In addition, we partner with companies to aid in solar installations, EV charging, and demand response to provide a full suite of services.

Unparalleled Service

The entire Energo team is dedicated to providing the highest level of customer service, and this starts by making the process of transitioning to Energo seamless. There are no fees or penalties for switching to Energo and there is never an interruption to current services.

Leads Greatly Appreciated!

We typically work with mid-size to large businesses all over New York in all different verticals. A good lead is an introduction to a business owner who pays their own utility bills and is open to exploring options to help them control their costs. We do not supply to residential customers.
