

Over the last 13 years, **Bene-Solutions LLC** has been a leading sales arm of **Colonial Voluntary Benefits**. Colonial's benefits are offered on an individual employee basis, done through payroll deduction. These benefits are offered cafeteria style, allowing the employee to choose the benefits that best suit the needs of themselves and their families. Our benefit managers work with each employee to best protect their health, and finances associated with rising health care costs. These benefits are at no cost to the employer, making them a great option for small business owners with a tight budget. Our benefit offerings include supplemental disability, accident insurance, cancer insurance, individual whole and term life, hospital bridge, and a combined dental and vision insurance.

Leads Appreciated: We work with businesses of all sizes. If you have employees, we can offer Colonial Voluntary Benefits to them. Business owners can also enroll. These work well on their own, or to enhance the benefit package you currently have in place.
