A. Christopher Sandstrom, RCA
Cayuga Tree Service, Inc.
55 years serving Central New York***

In this age of environmental awareness and sensitivity, it is important that we protect the investment in our trees and landscapes. Our trained crews, under the supervision of **ISA Certified Arborist, Christopher Sandstrom**, can assist you in tree preservation, pruning, removal, stump grinding and lightning protection. We also offer insect, disease control and fertilization through environmentally safe micro tree injections.

Central New York has been invaded by the Emerald Ash Borer. The insect has been found in all areas. It is imperative that anyone with ash trees make a plan to treat, or remove, since once affected the trees can become a hazard quickly.

Belonging to the Tree Care Industry Association and the International Society of Arboriculture, keeps us informed of up to date techniques in arboriculture practices and the safety requirements vital to our business.

Christopher Sandstrom is a member of the American Society of Consulting Arborists, and has attained the status of "Registered Consulting Arborist." We can assist you on any appraisal for damaged or destroyed vegetation on your property.

Leads: Property owners who desire consultation about the care and safety of their trees.
